

Truetones

Offering a level of beauty, luster and clarity that is unmatched by other finishes, the Truetone collection is a revolutionary program that virtually eliminates panel to frame color variation and greatly reduces dark end grain. Available on a variety of popular species, Truetone stains are affordably priced and will provide a fresh option to complement your current finish offering.

Truetone finishes offer superior blending of panels, framing and even end grain to provide a uniform, consistent appearance across the entire surface of every product. Each Truetone stain can be applied over Cherry, Hard Maple, Red Oak and White

Birch, and to increase the overall range of color, Brown, Caramel and Oyster glaze treatments can also be added. With your choice of either a 15° or 40° conversion varnish topcoat, Truetone finishes are as durable as they are beautiful.
